

ELECTRIC MIRROR®

HOTEL LUXURY

Electric Mirror Launches Surface Computing

TOUCH™ by Electric Mirror®

It is a world of options. Better access to information is a better guest experience.

Electric Mirror® introduces TOUCH™ Surface Computing, an interactive guest information system. Using the latest innovations in multi-touch surface computing, TOUCH™ by Electric Mirror® offers access to the latest news headlines and the ability to search the surrounding area for restaurants, bars and other places of interest. Guests will explore things to do and see within the hotel as well as nearby surroundings through large multi-touch enabled screen displays.

Electric Mirror® has been dedicated to the hospitality industry for over a decade and provides a complete solution, from project management and customer service to design-engineering, production and system integration.
