### Introducing the first ever dimmable lighted mirror TV

The Electric Mirror research and development team takes a giant leap forward by combining flawless, dimmable lighting with LCD-TV technology to create a never before seen mirror for the bathroom.

The lighted mirror uses warm, natural color lighting and maintenance-free bulbs that have a lifespan that exceeds a 7-year renovation cycle. With a dimmer feature, guests choose the lighting level of their preference; maximum lighting to prepare for the day and subdued lighting to relax and wind down.

For more information about dimmable lighted mirror products, or to schedule an appointment and experience Electric Mirror designs firsthand, contact an Electric Mirror representative at 425.776.4946 or consultants@electricmirror.com.
