Upscale-hotel guests not only look for a high-definition entertainment experience similar to what they enjoy at home, they have come to expect the same innovative features in a bathroom mirror TV as they have experienced in guestroom hospitality TV.

Electric Mirror® stays ahead of the curve with the first

Hospitality Mirror TV that enables high-definition free-to-guests (HD-FTG) premium channels such as ESPN, HBO, CNN and A&E, video-on-demand (VOD), playback and channel recording, Internet protocol TV (IPTV), in-room control and hotel-information services. These features and more are available in an upgradeable format responsive to technological advances and customization through **Electric Mirror's BridgePort™ solution.**

BridgePort™ interfaces with major IPTV and VOD partners and has both global compatibility and worldwide certification. Your investment is upgradeable for changes in IPTV and VOD partners; thereby, eliminating the replacement cost associated with consumer mirror TVs.

Based just outside of Seattle, Electric Mirror has been the industry leader for more than a decade, providing complete solutions from project management and customer service, to design-engineering, production and system integration.

THE WORLD LEADER IN LIGHTED MIRRORS AND MIRROR TV TECHNOLOGY
