

KEEN™ ONE-TOUCH

The brightest way to dim

Keen One-Touch, the latest generation of our patented Keen Technology, is the ideal dimming solution for lighted mirrors. It offers multiple pre-set light levels, including Night Glow with Eye-Sensitivity Adjustment. And because it automatically dims after a period of non-use, it's eco-friendly and reduces energy costs.

Ordering

Keen One-Touch may be added to select models as a **\$250 list upgrade**, notated by the addition of KC to the base model:

- **Ascension:** ASC2330-KC, ASC2336-KC, ASC2340-KC
- **Eternity:** ETE2130-KC, ETE30-KC
- **Fusion:** FUS2428-KC, FUS2836-KC, FUS3636-KC, FUS4240-KC, FUS6040-KC
- **Integrity:** INT2136-KC, INT3642-KC, INT4236-KC, INT5436-KC
- **Silhouette:** SIL2436-KC, SIL3636-KC, SIL4836-KC

Lead time is 4-8 weeks. However, the Fusion 28x36 with Keen One-Touch and the Ascension (all sizes) with Keen One-Touch will be in stock beginning June 2017.

Operation

Touch 1	66%	Turns on to standard brightness at 66%. Dims to 33% after one hour.
Touch 2	100%	Brightens to 100% for task lighting. Dims to 33% after one hour.
Touch 3	Off	Turns off.
Touch 4	1.5%	Turns on at 1.5% for Night Glow. Dims to 0.5% over 20 minutes.
Touch 5	33%	Brightens to 33% for room ambiance.
Touch 6	66%	Returns to beginning of cycle with standard brightness at 66%.

For lighted mirrors, the Keen One-Touch button is located in the center of the mirror, 5" from the lower edge. For Ascension medicine cabinets, the button is located in the lower right-hand corner.

Wiring

Keen One-Touch requires just two wires plus ground from an on/off switch to the mirror. You may also bring an un-switched connection to only control the lights with a touch.

ATTENTION: This product must be connected to earth ground in accordance with NEC code 250.20(B). Improper ground can result in irregular function of the unit.
