

# Savvy™ Home SmartMirror™

For today's smart homes and smart homeowners.

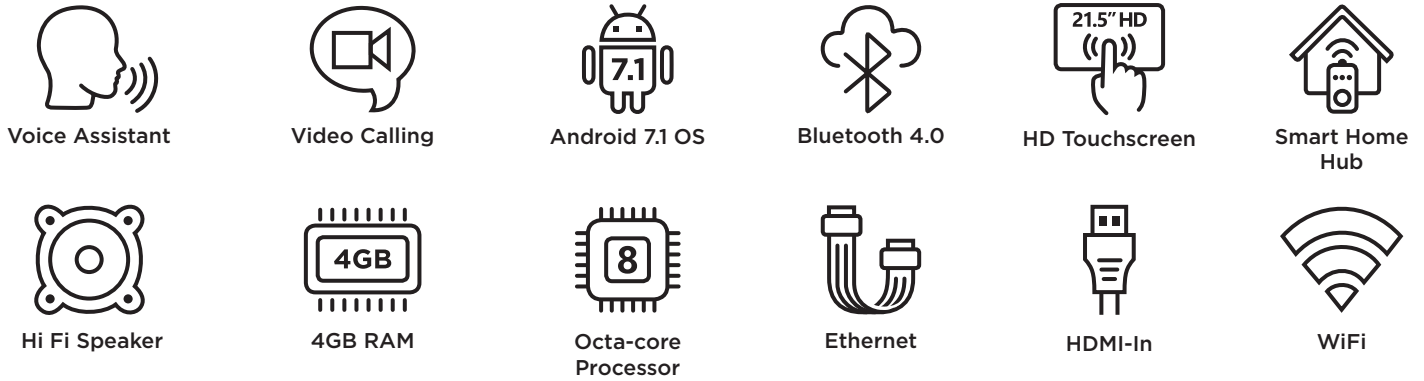

The first. And unquestionably the best.

No other smart mirror comes close to Savvy™. From the elegant and ergonomically-designed launcher, to the enhanced functionality that comes from the integrated motion sensor, far-field microphone, and multi-touch display, Savvy takes smart mirrors to whole new level.

Say goodbye to tiny screens, single-purpose gadgets, and disconnected devices. Savvy brings your entire digital world together in one large, elegant, intuitive and easy-to-use 22" display, offering unmatched efficiency and convenience. And because Savvy is compatible with any Android-based app or device, there's virtually no limit to what you can do.

**Let's get technical.** Sure, it looks great. But it performs great too – thanks to its innovative design, sophisticated engineering, and superior quality components.

**Make any room smarter.** Design the perfect Savvy for any room in your home – office, bathroom, living area, even the entryway. Choose a back-lit or non-lit mirror. Choose the size that best fits your space. Choose a horizontal or vertical orientation. Even choose your lighting pattern. Only Savvy offers you this smart of an approach to smart mirrors.

#### Office

A non-lit mirror is perfect for your home office, keeping your schedule and email handy, and keeping you organized and efficient throughout the workday.

#### Bathroom

A lighted mirror does double duty in the morning, allowing you to keep tabs on the news, weather and traffic while getting ready for the day.

#### Living Area

Follow along with a workout video, and when it's off, the vanishing display lets your mirror become a contemporary focal point for the room.

#### Entry

A framed entry mirror makes a bold statement, not to mention quick work of home automation control as you leave or return home.
